

THE DEATH OF AN ATHEIST

The Nobel Prize winning Irish playwright, Marxist and 'progressive thinker', **George Bernard Shaw**, (1856-1950) made this statement 80 years ago at the end of the Second World War.

'The science to which I pinned my faith is bankrupt. Its counsels, which should have established the millennium, led instead directly to the suicide of Europe. I believed them once. In their name I helped to destroy the faith of millions of worshipers, of a thousand creeds. And now they look at me and witness the great tragedy of an atheist who has lost his faith'.

The science to which George Bernard Shaw makes reference is the speculations of an Englishman, by the name of **Charles Darwin**, and his theory of evolution. Modern microbiology in its scientific understanding of complex genetic information for life now largely relegates Darwin's pseudo-science to an antiquated religious museum of, 'blind faith in blind chance'. The probability for a **microscopic single cell organism's** complex strand of DNA to appear as genetic information by random chance  in some sort of ideal primeval soup is a staggering **$1:10^{154}$** . 1:1 is an even probability or 50% chance of success. A one in a million chance is $1:10^5$ with five zeros after it. $1:10^{154}$ is one to a ten with a hundred and fifty-four zeros after it. To get your head around that probability, imagine a rotating cement mixer truck full of sand, and you with a pair of tweezers small enough to grasp only one grain of sand at a time. So you pick out a grain of sand, mark it, throw it back into the mixer, and repeat the process and on the very next attempt, grasp the very same grain of sand. Now if you think there's still a possibility understand; 'If the cement mixer was the size of the known universe, full of grains of sand, and you with your tweezers able to access any grain of sand in it, but only one at a time, and the same grain twice in a row - that would equate to a probability of only **$1:10^{94}$** .'

Now try and get your head around another single microscopic cell called the '**progenitor cell**'. You and I begin life as a single cell. One cell that replicates and becomes two cells and so on, until nine months and 17 trillion cells

later, a composite structure of cells pops into the world called a little baby. In that first cell, the 'progenitor cell' is the prescriptive information for the construction of your entire physical existence, (your entire body for the length of your entire life). To try and grasp this, then understand that if a woman's egg cleaves together over the first two progenitor cells, then two times seventeen trillion cells, and nine months later – two identical twin babies will be born. Same bodies, different people because the first cell and second cell information are near to identical. They will look alike for their entire life, same hair, same eye colour, same everything, and can even die from the same inherited genetic failure within weeks of each other well into their old age. In fact, if after 17 trillion cells and nine months a little baby girl is born, a microbiologist can count in the genetic information of the first progenitor cell, the number of eggs she will release in the course of her adult life. Now while that is exponentially more complex information than that of a single cell organism, understand one more thing; there is a **co-dependency of all genetic life** on earth. That little baby when it is born must eat other information based genetic material to grow and develop into a reproductive adult. That co-dependency by the way goes all the way to non-organic matter as well. You need oxygen (O₂) by design to breath your first breath, and water (H₂O) to hydrate your body for the rest of your life. Genetic life and the co-dependency of all information based life-forms on planet earth just doesn't happen by chance, could never happen by chance anymore than volumes of paper encyclopedias randomly grow out of trees. (Encyclopedias require intelligence, as do organic trees).

So if Artificial Intelligence (AI) is a planetary human thought bubble, then the Omniscience of the One God and His existence, (who having created a co-dependency of all genetic information, and then gives us all a brain with the ability to think and publish our thoughts), is as absolutely certain as your efforts would be futile to prove that He doesn't, if you had 17 trillion universes, full of sand rotating at the speed of light, and with your tweezers as long as your finger trying to snatch the same marked grain of sand, twice in a row. Darwin was a fabulous, fantastic religious liar. Evolution as a religious lie for self-existence, (if we blindly

believe it), is actually the dumbest religion on earth, if only because other religions place blind faith in some semblance of human intelligence, (as in a pope, a prophet or a guru). Evolution places blind faith in blind chance at astronomically, impossible odds. So atheism is dead in view of real science, and if you now call yourself an agnostic, consider one more thing about Charles Darwin.

A DARK AND TWISTED PAST.

Darwin advocated in his book, 'The Decent of Man' that evolved Caucasian (white) people should 'exterminate' tribal African and tribal Australian people to, 'widen the gap' between evolved man and the apes to advance the processes of 'human evolution'. If an indigenous Australian has his ancestry tested genetically, his forbears are from India. In fact the Indian government has mapped it's own genetic ancestry that confirms indigenous Australians as Tamil people who migrated from Sri Lanka to Australia as late as 1,500 years ago. (That's why they look the same, and something of their languages and traditions are similar). Darwin was a vile genocidal racist, and the Darwinian atheists who to this very day imprison indigenous Australians in a Darwinian-museum-mindset of having been in this country for over 50,000 years are hypocritical, religious, racist, liars of the worst deplorable kind. 1.3 billion Indians have to a varying degree been taught these facts in school for nearly fifteen years.

Now unfortunately, we can't stop there either. The so-called science that underpins late colonialist, socialist and capitalist ideologies and their competing godless propaganda, as either Nazi, Marxist or Consumerist, are founded on the so called pseudo-science of the 'Survival of the Fittest' by... (you guessed it), Mr Charles Darwin. It began with colonial European scientists doing genocidal experiments on tribal Australians and Africans in the late 1800s.

Then it so happens that the German dictator, Kaiser Wilhelm II believed there should be a race war between his Teutonic race and the eastern Slavic races to further the supremacy of race, and hence advance human evolution, and so 15-20 million people died in what became

the First World War, (1914-1918). The Nazi dictator **Adolph Hitler** did the same in the Second World War, (1939-1945) to advance the

Aryan race, and a further 70-84 million people died. In between these two wars, the Darwinist Marxist dictator **Josef Stalin** starved and deported to death as many as 28 million land holding peasants from 1931-1951, for the same **Marxist dictatorial**

economic theory that would eventually kill, in the twentieth century, a total of 200 million people; - *people who had the inherent right to exist, to live, to work, to seek truth, to succeed, to be happy, to love and procreate children, to grow old and enjoy grandchildren.*

And therein lies another little genetic marvel. A little baby does not just need other genetic information to eat, live and grow, it needs to be loved and nurtured as well, (and not murdered by Darwinian competition for ideological supremacy).

If we take into the equation from the indigenous deaths in Australia and Africa to the infanticide of the Marxist one child policy in China, plus all the Marxist and Fascist rebellions, and their military dictatorships all over the world, then the death toll that can be laid fairly and squarely at Mr Charles Darwin's feet, would be nearly half a billion people. Was the 'survival of the fittest' democratic capitalism any fairer when it bought the stolen grain from Stalin as he starved the Ukrainian peasants to death; or resupplied nitrates to Germany between world wars, or blew up and burnt to death innocent men, women and children in cities to make a quick and less expensive end to soldiers fighting world wars. (And if you're glad that you were not one of the innocent dead, think again because it all appears to be about to happen again, only on a much more, 'progressive' scale).

Is it any wonder that George Bernard Shaw lost his 'faith'. There is no hope in atheistic Darwinism, no respect for life, no conscience, no faith and no love. Blind faith in blind chance is evil. It is dark and mysterious. It lures people towards a communal and individual self-empowerment, only to cheapen life and make people impoverished of true love, human conscience, and ultimately of life itself.

Perhaps the most diabolical device for the Darwinian ascendancy that empowers a certain few people over all other people on earth is your mobile phone. Data retention makes you individually empowered, but individually predictable and hence your brain, individually programmable. So try asking an atheist what love is, or try asking your phone. The answer is almost invariably, 'chemicals in your brain', but it is a brain with **84 billion neurons** formed from prescriptive information in the first **progenitor cell** of human existence, and that makes a little baby recognize and love, and reach out for the face of it's caring parents. Love like life, does not happen by chance. Love is face to face, not face to screen for imagery that programs your thinking, attitudes, dreams and subconscious decision making. You don't have to be a Darwinist, a political extremist, or even believe in evolution to be locked into the system. The dumber and more ignorant you are, even as a tech savvy peasant, the better it works for them. This is where your secular Darwinian world is at now, and has been for some time.

We can choose to use our growing knowledge to enslave people in ways never dreamed of before, depersonalising them, controlling them by means so carefully selected that they will perhaps never be aware of their loss of person-hood.

Darwinian psychologist, B F Skinner

A BRIGHTER FUTURE

Now that is the godless human history of the last 120 years. What must we turn around to make a brighter future? First of all, reinstate One God as the Author of our genetic information in our material universe, who by His Word has created all things in co-dependency by His own Power and for Himself. Secondly grant Him the Authority that His authorship of life deserves.

John 1:1 In the beginning was the Word, and that very Word was with God, and that Word was God. ² This One Himself was in the beginning with God. ³ All things came to be by His Hand, and without Him not even one thing that was created, came to be. ⁴ In Him was Life, and this Life was the Light of men, ⁵ the same Light shines in darkness, and the darkness does not overcome Him. ¹⁴ And the Word became flesh...

The same Word as information from God that gives us a physical existence in a material world, gives us a conscience by a simple command to love Him, and love

one another as well. Human conscience is what makes us different to animals. Our conscience is like a users manual where we break the rules instinctively for our 'survival of the fittest' self-esteem, self-image, and self-interest every day. We are a mixture of good and evil – we love to hate, and hate to love depending on how the script of our self-focused movie is playing out in our imagination. We all rightly want to be loved. We all want to be forgiven for our offence, and yet we demand justice on those who offend us, (with suitable compensation of course). We are a mixture of right and wrong for sure, but without an accountability to God as our Maker, we then become in our ability to hate and kill - worse than animals simply because of our conscience driven ingenuity, (or lack of it). Useless religions may start wars, but no one religion does genocide better than Darwinian atheism. It is unconscionable. Atheism is blind in it's survivalist creed to sacrificial love and simple godly kindness. Faith in blind chance must die. Faith in God's Word must revive. Now how can this happen? We cant make God out to be what we want Him to be, any more than we can write our own genetic code. So quite simply for an all knowing, all powerful God of Perfect Love and Perfect Justice, to be able to forgive our sins, and heal our inherent mixture of good and evil, He must sacrifice that very aspect of His own Person that is His Word, the very Word that created us, and the Word that by command defines good and evil to give us a conscience. Now this same Word that gives us the freedom of choice to love and do good, and not evil, must then in His Flesh take the blame for our choices.

The same Word also as the just, 'Sentence of Death' on us for our corruption, must become Flesh, and in His Flesh be sentenced to death in our place as the blameless Lamb of God. God our Father buries the Word or Law that condemns us. The Just for the unjust, the altogether Perfect Son for a world full of imperfect and sinful people. God then raises Him from the dead, for to leave the sinless Man in the grave would be in and of itself, a miscarriage of His own Justice, and this can never happen. Likewise if you turn to God as a loving Father in the Name of Jesus His Son, He is compelled of His own Character to turn to you. One Almighty God is love, and He loves to heal the heart of even the most demon infested Darwinian

brain. If you turn in faith from your sinful life to God the Father of Life, (that is to say, repent and call on the Name of Jesus His Son to be saved from sin and death), and you believe in your heart that God has raised Him from the dead, then you will be saved. If by faith we then join ourselves to Him in His death and die to self, then He joins ourselves to Him in resurrection Power in a new and Spiritual Life forevermore. God is love, and He is trustworthy. To fully express His love for us, this sacrifice of His Word must be the sacrifice of His only begotten, and beloved Son. The Word must become flesh to be the Lamb of God who takes away the sins of the world. His Name is Jesus, Son of the Living God, and as the Blameless Lamb of God, He is worthy of all praise and our utmost faithfulness.

So God who is omniscient and omnipotent is also intimate to all He has made to save and spiritually recreate in us, a clean heart. To turn around our world we must first turn ourselves around to face the Face of Him who will judge the earth in righteousness. Time is running out for our depraved and brainwashed world. God in His Love and Justice cannot allow things to just keep on getting worse until we are all locked into a United Nations high-tech, Darwinian dungeon that will destroy our God given life, love, freedom and simple happiness forever. If a socialist run United Nations were to combine all their Darwinian brains, all together in an AI cement mixer of trillions of randomly smashing neurons to advance their globalist cause of secular humanism, (over and above the belief in One God), then whilst this still might not harm their cause, it still wont change the facts. The God of Israel exists, just as surely as the nation of Israel exists today with Jerusalem as her Eternal City. Don't bet your life and eternal conscience at impossible odds that He doesn't. Find a Bible, read the Gospel of John and pray to God our Father in Jesus Name. Jesus will come again to save those who turn to Him, and separate them from those who turn away.

May the love of our Creator God, the God of the Bible,
and the God of Israel through His Eternal Word and
Holy Spirit save us from sin and death, evil and hell.

George Bernard Shaw
